

Reflective thread

Application

The reflective thread appears gray in daytime, but flashes in luminous silver color when viewed at night in the headlight. Reflective thread can be crocheted together with other yarns, and is perfect for weaving and knitting hats, scarves, apparels, etc.

Reflective Thread

Reflective thread, also called reflective yarn, is one of reflective materials, the most smallest of reflective thread can be 0.25mm width, mainly used for making ribbon and intertwined textile fabric for reflective function, it can apply for decoration, construction, safety, clothing and other fields.

Reflective thread can be divided into single reflective side and double reflective side.

As per different reflectivity, it can be divided into mid-intensity grade and high intensity grade etc.

It has different specifications: 0.25mm, 0.5mm, 0.8mm, 1mm, 1.5mm, 2mm, 3mm.

Product Name	Specification	Meters Per Roll	Remark
High-intensity Single Side Reflective Thread	1mm	3000m	
	1.5mm	2000m	
	2mm	1500m	
	3mm	1000m	
High-intensity Double Side Reflective Thread	0.25mm	6000m	
	0.3mm	6000m	
	0.037mm	5000m	
	0.5mm	4000m	
	1mm	2000m	
	1.5mm	1000m	
	2mm	1000m	
	3mm	1000m	
Rainbow Double Side Reflective Thread	1mm	2000m	
	0.5mm	4000m	
	0.25mm	6000m	
	3mm	1000m	
Reflective Embroidery Yarn	150D	5000m	
	230D	5000m	
	300D	5000m
